

# *Milton Amateur Radio Club*

*P.O. Box 4072*

*Milton, Florida 32570*

*ARRL affiliated Club (ARES)*

*Amateurs are individuals licensed for non-commercial use of designated radio bands, for the purpose of private recreation, exchange of messages, experimentation, and emergency communication. Radio amateurs operate under rules which limit the maximum power of transmissions and govern the technical and operational characteristics of those transmissions. Each amateur radio station is issued a designated call sign to allow identification of stations.*

*Amateurs, are called hams in many countries. It is a hobby and self-training. The term "Amateur" is used to differentiate it from commercial and professional two-way radio services. The Federal Communications Commission governs amateur radio operation in the United States. All countries*

*are coordinated through the International Telecommunication Union. An estimated two million people throughout the world are regularly involved with Amateur Radio.*

*We, the Milton Amateur Radio Club, have approximately 51 members. We, as a club, try and teach and give input into our amateur radio hobby.*

*We all also have families, so we know how important it is to teach our family and friends about the different things that we learn in ham radio. It's up to us, the ham radio operators, to teach and guide young minds so they can learn electronics, enjoy our hobby, and the spirit of living a good wholesome life.*
